

The Food Poisoning Story

Why do you think the boy gets sick? What do you think is going on inside his body?

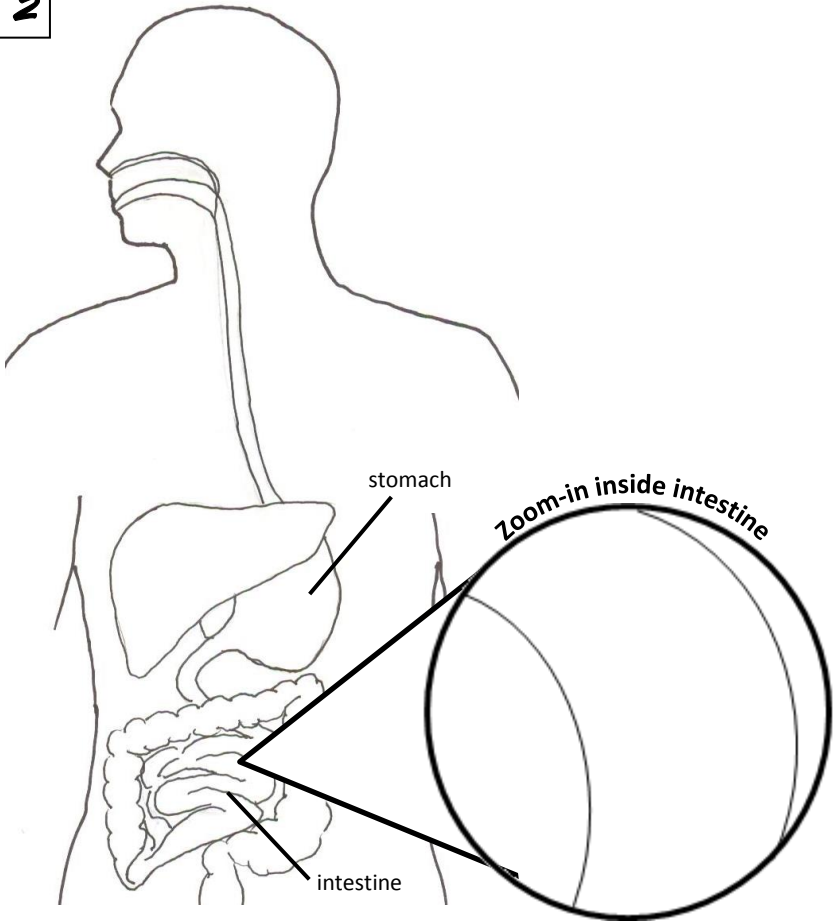

The raw chicken was accidentally left on the kitchen counter all day near a sunny window.

1

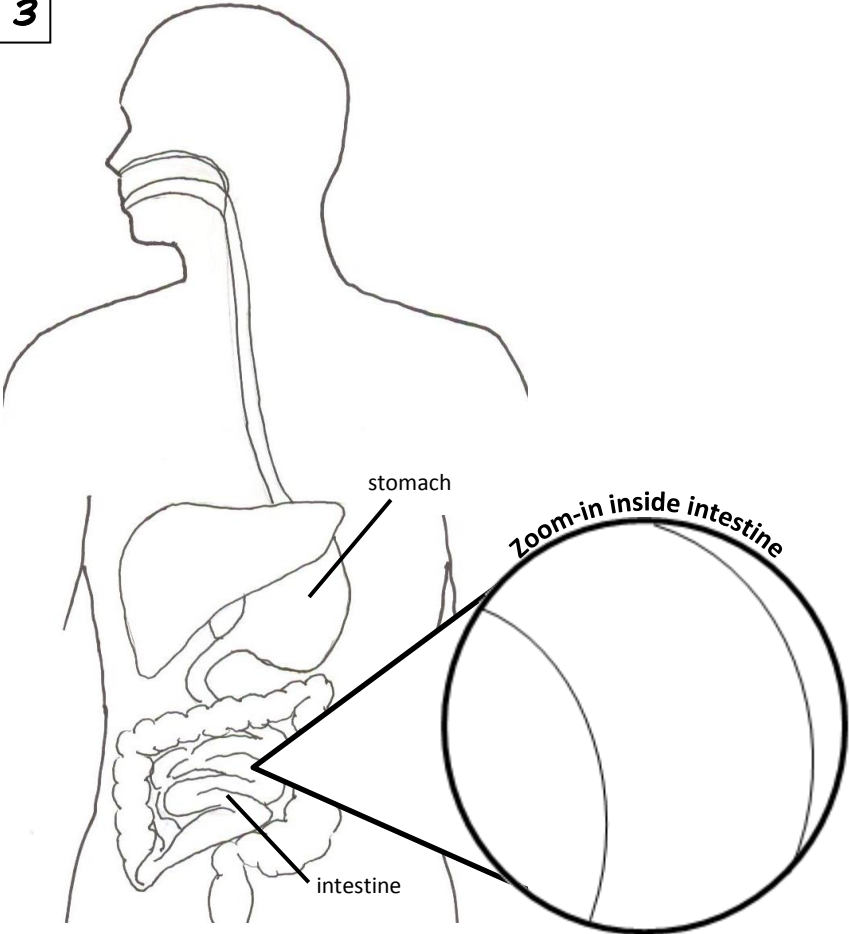

The boy microwaves some chicken. The outside of the chicken is white and steaming but the inside is still pink (not fully cooked.) He eats a chicken sandwich around 6:00 PM. Yum!

2

Around midnight, the boy gets a **stomach ache**, runs a **fever**, has **diarrhea**, and **vomits**. Yuck! The boy stays home from school the next day because he doesn't feel good.

3

However, by dinner time the next day, the boy feels fine again.
